Calculating Food Costs

Overview: The Certified Dietary Manager, Certified Food Protection Professional (CDM®, CFPP®) is the financial and budgeting expert in the foodservice department to help their facility’s bottom line. After labor costs, food cost will use up much of the budget. Fitting food costs into your budget is a vital skill for the CDM, CFPP.

Supplemental Material: Access the Gap Analysis Tool to supplement your practices.

Standard 1
The CDM, CFPP calculates food costs in order to make decisions and meet budgeting goals.

<table>
<thead>
<tr>
<th>CRITERIA</th>
<th>IMPLEMENT &amp; EVALUATE</th>
</tr>
</thead>
</table>
| **1.1** The CDM, CFPP calculates their department’s Monthly Food Cost. | Example:  
  Beginning Inventory $21,745.00  
  PLUS Purchases + $7,976.00  
  MINUS Ending Inventory - $17,365.00  
  **$12,356.00** |
| **1.2** The CDM, CFPP calculates their department’s Food Cost as a Percentage of Sales. | Food Cost as a Percentage of Sales  
  Monthly Food Cost DIVIDED by Sales  
  Example  
  Monthly Food Cost $12,356.00  
  DIVIDED by Sales ÷ $36,421.00  
  **33.9% (.339)** |
| **1.3** The CDM, CFPP in Healthcare calculates their Raw Food Cost Per Patient Day (PPD). | **Per Patient Day (PPD)**  
  Monthly Food Cost DIVIDED by Total Patient Days  
  (Total Patient Days = the number of patients MULTIPLIED by # of days in the month)  
  Example  
  Monthly Food Cost $12,356.00  
  DIVIDED by Total Patient Days* ÷ 2,850  
  **$4.33 PPD** |

*ANFP Benchmarking 2016 Data shows $5.35-$7.41 Food Cost Per Patient Day for Skilled Nursing Facilities*  

*Total Patient Days = 95 patients x 30 days*
### Total Cost Per Patient Day

**1. Monthly Food Cost**

**2. PLUS Labor Costs***

**3. DIVIDED by Total Patient Days**

<table>
<thead>
<tr>
<th>Calculation</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Monthly Food Cost</td>
<td>$12,356.00</td>
</tr>
<tr>
<td>PLUS Labor Costs*</td>
<td>+ $15,600.00</td>
</tr>
<tr>
<td>DIVIDED by Total Patient Days</td>
<td>$27,956.00</td>
</tr>
<tr>
<td></td>
<td>÷ 2,850</td>
</tr>
<tr>
<td></td>
<td>$9.81</td>
</tr>
</tbody>
</table>

*In this example, Labor Costs include:

- **Wages:**
  - 5 cooks x 40 hours/wk @ $15.00/hour = $3,000/week = $12,000/month
- **Benefits:** $12,000 x 30% = $3,600/month

**TOTAL LABOR COSTS = $15,600.00**

As a CDM, CFPP, you will estimate personnel/labor costs (use HR as needed). Factors to consider:

- Should you calculate in benefits?
- Should you calculate in all employees such as waitstaff, sanitation, etc.?
- Should you just calculate those preparing the meals?
- You may also want to consider utilities or other costs that are worked into your department’s costs or budget.
- The key is to choose a method to count Labor Costs and be consistent with it to compare from month to month.

### Raw Food Cost per Meal

Monthly Food Cost DIVIDED by Total Meals Served (using whatever you define as a meal served)
